

HORIZONTAL FLOW PACK MACHINES FOR FOOD PACKAGING

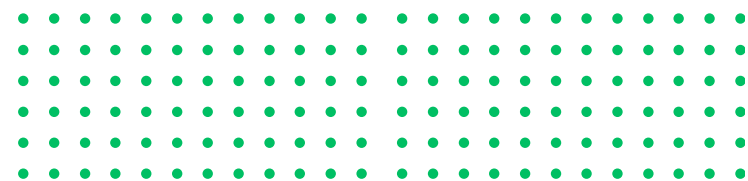

- ✓ High speed
- ✓ Secure packaging
- ✓ Extended product shelf life

APPLICATIONS

- ✓ Baked goods and snack cakes
- ✓ Fruit and chocolate bars, wafers
- ✓ Cheese and cured meats in modified atmosphere
- ✓ Food service kits
- ✓ And many more food products

TECHNOLOGY THAT ENHANCES YOUR PRODUCT

Bariletti Srl horizontal flow pack packaging machines represent a perfect combination of innovation, reliability, and flexibility, designed for packaging food products using various types of heat-sealable films.

MAXIMUM OPERATIONAL FLEXIBILITY

Custom configuration based on the product: the film reel can be positioned either on the top or bottom, ensuring optimal performance in every application.

SOLUTIONS FOR EVERY PRODUCTION NEED

Available in rotary, intermittent, and box-motion versions, Bariletti machines perfectly adapt to different speeds, formats, and production types.

PRESERVATION TECHNOLOGY

- Possibility to integrate advanced systems:
- Gas flushing (MAP) for extended shelf life
 - Air removal from the package

The result is safe, protective, and high-quality packaging, with a three-seal pack (two transverse and one longitudinal).

PRECISION AND ADAPTABILITY

Bag forming box available in fixed or adjustable version, ensuring fast format changeovers and maximum precision.

UNLIMITED VERSATILITY

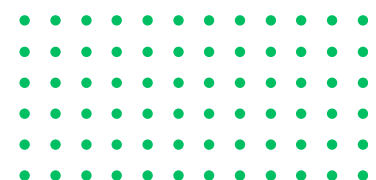

A single solution for a wide range of products: Bakery products, sweet and savory snacks, confectionery, and fresh or refrigerated products. Biscuits and snack cakes, croissants and brioche, rusks, packaged bread (rolls and baguettes), crackers and breadsticks, cereal and fruit bars, chocolate bars, nougat, wafers, cheeses, cured meats, piadina, pizza, and crepes.

HYGIENE AND BUILD QUALITY

Available entirely in stainless steel or with product-contact parts in stainless steel and FDA-certified materials, ensuring the highest standards in the food industry.

BARILETTI SRL

RELIABILITY, INNOVATION AND QUALITY AT THE
SERVICE OF YOUR PACKAGING.

MOD. FL540
PBA "CELLOPHANE" – STANDARD

ROTARY HORIZONTAL FLOW PACK PACKAGING MACHINE

TECHNICAL FEATURES

- Movements driven by electric axes
- Independent upper reel holder unit, with film return rollers for film width up to 540 mm, equipped with pneumatic expanding shaft
- Wheel unit composed of 3 pairs: pulling, sealing, and fin folding, with manual height adjustment
- Longitudinal sealing wheels diameter: 100 mm – sealing height: 15 mm
- Standard universal forming box for film shaping
- Infeed paddle conveyor 1500 mm with double lugs included
- Rotary cutting and sealing unit with 1 pair of jaws Ø 141 mm, width 250 mm, complete with stainless steel half-moons for product passage; standard sealing width 25 mm (12.5 + 4 knife + 12.5)
- Outfeed conveyor driven by three-phase motor, with FDA-certified BLUE belt
- SMC pneumatic unit
- Maximum production speed: up to 120 pieces/minute

QUALITY COMPONENTS

Selected materials and components:
Mitsubishi, Weintek, Bonfiglioli, Megadyne, SMC

COMPLIANCE

Machine compliant with CE regulations
