KEY FEATURES:

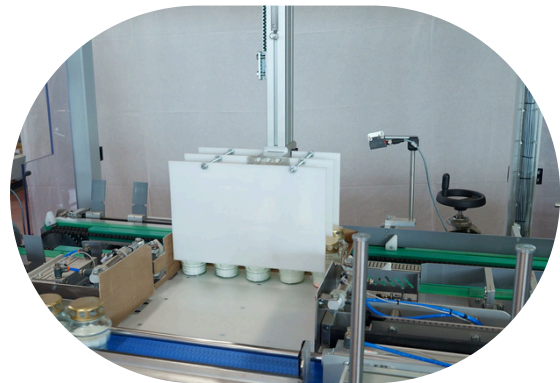

Carton Magazine with Automatic Feeding

Belt-driven system powered by a pneumatic actuator, with integrated carton pressure control sensor for consistent feeding.

Automated Product Loading

2-axis robotic pusher ensures accurate and efficient product insertion.

Intermittent Motion Conveyor System

Chain conveyor with electromagnetic clutch, allowing adjustable pitch from 220 mm to 500 mm for different product formats.

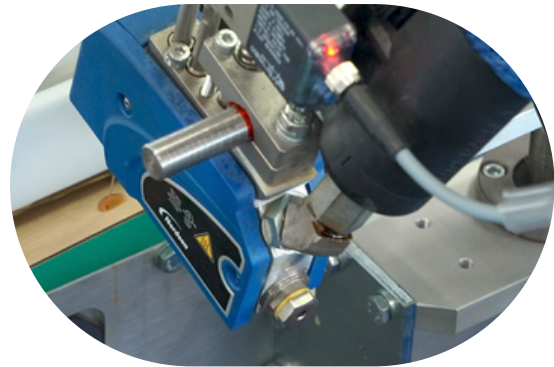

Adjustable Conveyor Width

Manual adjustment from 220 mm to 400 mm, ensuring flexibility across multiple product sizes.

Quick format changeover

Rear flap closing station with hot-melt glue application

- Pick-and-place arm with electric axis, equipped with a vacuum generator suction head, carton pick-up control photocell, and vacuum switch
- Product loading station with 2-axis robotic pusher
- Front flap closing station with pneumatic glue application system (hot-melt)
- Machine outfeed conveyor belts
- Remote monitoring system for machine control and diagnostics

Optional & Additional Equipment

- External infeed conveyor for single-lane product feeding to multi-product loading station
- Secondary conveyor for product positioning and alignment
- Additional electric axis for flexible product positioning during loading
- Side stop device with lateral guide rails for precise product control
